

RESONETICS®

LIGHTSPEED LAB® DAY

Eliminate the weeks and months it typically takes to go through multiple design iterations, and leave our lab with parts in hand.

What It Is

A Lightspeed Lab® day at Resonetics® is an on-site accelerated development day that is supported by dedicated engineers, technicians and equipment. Eliminate the weeks and months it typically takes to go through multiple design iterations.

How It Works

- Send files for full or partial processing before your arrival
- Iterate multiple times with dedicated lightspeed engineers, technicians, and equipment
- Testing equipment available on site including dimensional, Af determination, Instron, and SEM
- Personal testing equipment welcome on site
- We can supply material for your project or you can bring your own

“We left with ten different iterations of our initial design.”

-R&D Engineer

“Every startup should be doing this.”

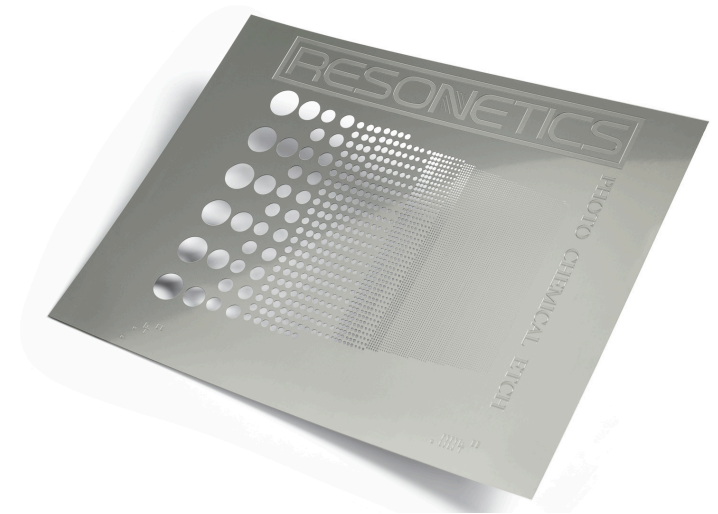

-R&D Engineer

Develop Your Project at Lightspeed

Connect directly with our engineers to schedule your Lightspeed Lab day at labday@resonetics.com or visit us at Resonetics.com to learn more about our Lightspeed Lab capabilities!

Why It Works

- Eliminates weeks and months normally taken to go through multiple design iterations
- Dedicated resources for quick-turn prototyping
- Meet our engineers who are working on your part and collaborate with them in person
- Leave the site with multiple iterations of your part in hand
- Capabilities including:
 - Laser Processing
 - Nitinol Processing
 - Metal Fabrication
 - Raw Material
 - Sensor Technology & Medical Power
 - Microfluidics
